PRESENTATION

My name is Anderson Cardoso. I have been working as a web and mobile front-end developer since 2021, specializing in React, React Native, and Next.js, all implemented with TypeScript. I also have prior experience with Angular 7, and Node Js where I worked on full-stack projects as a self-employed professional.

My priorities include maintaining code quality and ensuring a positive user experience. I take pride in my proficiency in identifying and resolving bugs.

I consider myself an easy-going person with the ability to interact effectively with various types of people. I enjoy learning from others and exploring different approaches to problem-solving. I am always eager to assist and support others with their tasks and challenges.

PROFESSIONAL EXPERIENCE

WEFIT SERVICE DESIGN, São Paulo, SP   2022 - Present
Quality Engineering - Development Patterns and Code Responsible - Health App (2023-Present)
- Overseeing a team of 6 software engineers in a hybrid mobile application project using **React Native** CLI with a white label pattern for more than 3 companies.
- Scanning and categorization of all the processes and flows of the application, searching for bugs, logic errors and vulnerabilities, as well as UI/UX mistakes.

Main Front-End Developer - Dentistry App (2022-2023)
- Scanning and categorization of all the processes and flows of the application, searching for bugs, logic errors and vulnerabilities, as well as UI/UX and business rules mistakes.
- Fixing all the issues of the hybrid mobile application project using **React Native** CLI and integration of news features.
- Implementation of facial recognition by photos, to improve performance of the requests, sending just a crop of the facial part of the photos to grant access to a feature of appointments.

Software Front-End Developer - Delivering Track Web App (2022)
- Development and integration of global components (as chart and filters) at a PWA using **React** following the plan design.

INFOCAP, Novo Hamburgo, RS   2022
Software Developer (2022)
- Development of new components to the main company intern library using **Angular 7**.
- Scanning and categorization of all the processes and flows of the application, searching for bugs, logic errors and vulnerabilities, as well as UI/UX and performance issues.

SKILLS

Front-End Web and Mobile Development
- TypeScript, JavaScript HTML5, CSS3.
- React, React Native, Next Js, Angular.
- Styled Components, SASS.

Back-End Development
- TypeScript, JavaScript, C#, SQL.
- Node, Express, Asp.Net.
- MongoDB, SQL Server.

EDUCATION

ADA TECH   2021 - 2022
Integrated Technical Course of Web FullStack Development.

ULBRA - UNIVERSITY LUTHERAN OF BRAZIL   2012 - 2015
Technical Coursework in Systems Analysis and Development.

ACTIVITIES

- **Vice President of the Student Council**, ULBRA Technical Coursework in Systems Analysis and Development, Torres, RS
